Rita Technology Services, a leading search and recruiting firm in the Information Technology space, has launched a new division focusing on e-Learning. With Rita’s 40 year experience in IT service, offering online courses in the IT space is a logical addition to their business. Rita is now offering over 170 different e-Learning courses and will be looking to become a main supplier of these courses to many of their valued clients. In addition, they will look to bring in new clients in need of these offerings. In addition to providing online courses, Rita is offering a revolutionary Learning Management System (LMS), that will provide users with a highly interactive and collaborative experience. Through this system & courses, Rita looks to change the landscape of e-Learning and bring their same passion for high quality IT service to the e-Learning marketplace.

Rita’s learning system will include many dynamic features that experts expect will bring a refreshing change to the online course market. Their courses are a significant improvement from much of the other offerings in the market, which many feel have not evolved in parallel with the growth of technology & social media. Rita’s courses include highly interactive features such as: live study groups and student collaboration, full mobile optimization, live forums, social media integration, a full gamification system with dynamic point integration and, most importantly, high quality learning content with a 98% pass rate. Many feel the market is ripe for a new, exciting offering that will provide much needed innovation in a space that some feel has become stagnant with online courses lacking innovation.

98.4% Pass Rate
Instructor-led lectures

All Rita Courses replicate a live class experience with an instructor on screen delivering the course’s theories and concepts. These lectures are pre-recorded and available to the user 24/7. They can be repeated, rewound, fast forwarded and are fully controlled by the user. All Rita instructors have a minimum of 10 years experience in the subject matter they are teaching and many times are the authors of the official content from the vendor. These instructors are energetic and charismatic to ensure that the student is engaged throughout their course and enjoys the experience.

Visual Demonstrations, Educational Games & Flashcards

Rita recognizes that all students do not learn alike and different delivery mediums are needed in order to achieve success for a large student base. With that in mind, we delivery our content in a variety of different ways to ensure that students stay engaged and productive throughout their courses. Our courseware includes instructor-led lab demonstrations and visual presentations that allow students to develop their skills based on real world scenarios explained by the instructor.
Mobile Optimization & Progress Tracking

Our courses are optimized for all mobile devices allowing students to learn on the go whenever they have free time. Students can access their courses from anywhere and their progress is completely tracked and recorded.

Quizzes and Exam Simulators

Rita’s custom practice exams prepare you for your exams differently and more effectively than the traditional exam preps on the market. Students will have practice quizzes after each module to ensure you are confident on the topic you have completed before proceeding. This allows students to gauge your effectiveness before moving to the next module in your course.

World Class (LMS) Learning Management System

Rita provides the next generation learning management system (LMS). An experience that combines the feature set of traditional Learning Management Systems with advanced functionality designed to make learning management easy and online learning engaging from the user’s perspective. Users can access our platform anywhere, on any device to learn, share, and grow in real time. Learn anytime, anywhere 24/7.
Learning Paths

These learning paths outline the certifications/training needed for each given position. The Job Titles are all listed on the right hand side and the certifications are in a progressive order designed in a way to make it easiest for the student.
Complete List of All Courses

Cisco Complete Network Certification Training

Cisco 100-101: CCENT - ICND1 - Interconnecting Cisco Networking Devices Part 1
Cisco 200-101: CCNA - ICND2 - Interconnecting Cisco Networking Devices Part 2
Cisco 210-060 CICD: Implementing Cisco Collaboration Devices
Cisco 210-065 CIVND: Implementing Cisco Video Network Devices
Cisco 300-101: CCNP - ROUTE - Implementing Cisco IP Routing
Cisco 300-115: CCNP - SWITCH - Routing and Switching
